www.linkedin.com/in/chlo-ng

Front-end focused software engineer with 2 years of experience building React applications in enterprise and consulting environments.

Experience

SrcLogic

Arlington, VA

Software Developer

Aug. 2024 – Present

- Spearheaded the research and development of the company's first React UI Gallery, establishing a centralized library of reusable, production-ready components, accelerating delivery and ensuring design consistency across multiple projects.
- Conceptualized and built a high-priority warehouse sales event management feature in React, establishing a new process with a structured, centralized system for annual planning and financial projections.
- Consolidated multiple Excel reports into a single React dashboard, cutting email chain volume across 20+ departments and 50+ employees by 75% and giving stakeholders a real-time, at-a-glance view of business performance.
- Reduced front-end load times by ~67% (from 30 seconds to less than 10) by migrating from server-side to client-side filtering, significantly improving user experience and component latency.
- Added custom quick-select time presets to the PrimeReact Calendar (Last Quarter, Year-to-Date, etc.), cutting multi-month date selection down to a single click.
- Served as one of two front-end developers on an Agile team, collaborating with UX designers and back-end engineers to deliver a full application from design to production in under 10 sprints, adopted by 30+ senior-level managers at the client company.

CarMax

Richmond, VA

Technology Intern

Jun. 2023 – Aug. 2023

- Led the testing and implementation of a new in-house UI component library into production, contributing to company-wide frontend standards and enabling scalable adoption across teams and subsidiaries.
- Improved the 360° image rendering process by optimizing the client-side conversion algorithm in React, cutting processing time from 20 minutes to under 10 minutes per car.

Education and Certifications

Georgia Institute of Technology

Atlanta, GA

B.S. in Computer Science, Threads: People & Media

Aug. 2021 – May 2024

GPA: 3.80 (Highest Honors)

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Graphics, Information Visualization, User Interface Software, Database Systems, Creative Design Practices, Video Game Design

Certifications: Codepath Intro to iOS Development, Pega Senior System Architect '24

Projects

Friend of a Friend (FOAF) | React, Javascript, Firebase, Figma

Nov. 2024 – Present

A promotional site and event coordination platform for FOAF, supporting event sign-ups, announcements and admin tools.

- Designed and prototyped user-centric wireframes, translating brand identity and visual whimsy into intuitive interaction flows to encourage user engagement.
- Led end-to-end full-stack development, building responsive React interfaces integrated with Firebase authentication and real-time database updates for secure, scalable workflows.

Roam: Travel App | React, Javascript, Figma, Google Maps API

Sep. 2023 – Dec. 2023

A website used for tracking visited destinations and managing travel wishlists.

- Translated Figma wireframes into React components, including location input and filtering, integrating the Google Maps API for accurate geolocation and map-based exploration.

Skills

- **Programming Languages:** Typescript, Javascript, HTML/CSS, Python, Java, SQL
- **Frameworks & Libraries:** React, Tanstack, Prime React, Vite, Material UI, Redux
- **Databases:** Firebase, MySQL, PostgreSQL
- **Tools & Platforms:** Figma, REST APIs, Netlify, Vercel, Pega, Postman, AWS CodeCommit, GitHub, JIRA
